Sl. No.	Section / Clause No.	Page No.	Tender specification / Clause Description	Bidder's Query	HOGPL/VCS Reply		
Commercial							
1	USM Datasheet	1 of 1	Multipath (minimum 4 path)	As USM will be used at 4 bar for 150#, we request HPOIL to consider 2 path USM meter (this is standard practice in all CGD companies for DRS application), as minimum 4 path or higher is recommended for 300# custody transfer applications , kindly provide acceptance for the same	Refer Corrigendum #4		
2	USM Datasheet	1 of 1	Transmitter Type - Electronics SMART compatable with HART protocol of latest version	We request HPOIL to consider meter having 4-20mA output instead of HART protocol, kindly provide acceptance for the same			
3	USM Datasheet	1 of 1	Accuracy Class - 0.1%	2 path USM comes with an accuracy class of 1% , we request HPOIL to provide acceptance fro the same			
4	USM Datasheet	1 of 1	Straight meter run of 10 ND(Nominal pipe diameter) between upstream of the flow conditioner, 10 ND between flow conditioner and the meter and 5D downstream of meter shall be supplied by the meter manufacturer and used during wet calibration.	For 2 path USM meter Straight run is not required as per OIML (same has been mentioned in catalogues of OEM for USM meters) we request HPOIL to consider the same as it will also reduce the footprint of the DRS			
5	USM Datasheet	1 of 1	During wet calibration.(7 point calibration before adjustment, 2 point verification after adjustment in USM electronics)	We understand that wet calibration is not required for 150# USM meters (as the outlet pressure is also 4 bar only), kindly confirm bidder's understanding is correct			
6				We request HPOIL/VCS to provide extension for 1 week from the date of receipt of queries reply			
Note: This Reply to bidders queries shall form an integral part of the bidding document and shall be signed/stamped and submitted along with the bid. All other terms and conditions of tender documents shall remain un-changed.
